The Creative Edge building which houses the high-definition television studios.

What the students say...

Being a competent user of all types of media equipment is essential for future employment in the film & TV industry. From my use of the university’s media facilities I now feel confident going onto any set and being able to use the equipment proficiently and safely, giving me the confidence to excel when working on professional sets.

LEARNING SERVICES

Learning Services is a central support department whose key purpose is to support learning and to develop a responsive learning environment for students and staff, through services and facilities, research and development, information and support.

www.edgehill.ac.uk/ls
MEDIA DEVELOPMENT TEAM

The media development team provide support to students and staff who use our media facilities. The team is based in the Creative Edge building, room CE006 on the ground floor, just pop into the office or email: mediadevelopment@edgehill.ac.uk

Jim McNicholas is available in the University Library if you need some help and advice about using the media equipment we loan. Please ask for Jim at the Welcome Desk.

Training and support

The media development team provides one-to-one or group training in the use of technical equipment within the studio environment.

The team also provides support for software such as Final Cut Pro or Adobe.

Telephone
01695 657283 or ex 7283
The Creative Edge building houses our high-definition television studios.

We offer industry standard broadcast equipment with:

- Camera channels operated via either a studio configuration or hand-held
- Production galleries and control rooms with reference lighting
- Totally tapeless workflow with a media asset management system
- Fully independent talk back system to all studio areas

www.edgehill.ac.uk/ls/tv-studio
Equipment in the studio includes:

- Sony and JVC HD Camera Channels
- Sony MVS-3000 & For-A HVS Vision Mixer
- Black magic design HD Router
- EditShare media asset management system
- Large Chroma Key infinity wall
- Fully populated motorised lighting rig
EDIT SHARE

EditShare is a Media Asset Management (MAM) system. It provides Department of Media students and staff with a network storage solution for specific media items produced in both TV studios and on student cameras.

- You can ingest from either of the two television studios and it allows students to collaborate on media files once stored. You can also track and search for items already within EditShare.

- The MAM supports files and media created on student cameras as well as work created and edited using Final Cut Pro software and i Macs within the dedicated media classrooms in the Creative Edge building.

- Students studying courses within the Department of Media will automatically be registered to use EditShare, and log in details are provided during induction.

- Access to the MAM is via dedicated i Macs within Creative Edge.

- If you have any problems accessing the EditShare system or have a query about your storage space, please contact the Media Development Team.
Media students have exclusive access to the wide range of specialist, broadcast-quality media items listed in this brochure. Items are typically loaned overnight until 9pm the following day and are renewable once. Items can also be requested in advance (minimum of three working days notice). Use our online request form:
www.edgehill.ac.uk/ls/media-booking

Occasionally, you may need equipment for an extended period of time. You will need to obtain a non-standard loan form (available from the Department of Media) and have it signed by a member of academic staff before you request your items. Bring your signed form with you on the day of collection.
VIDEO CAMERAS

JVC SDHD Digital Camera
