What is eShare?

eShare is a digital **repository** for teaching and learning resources.

Why use eShare?

Resources can be stored in eShare and linked to multiple Blackboard courses, reducing the number of files that need updating, and saving on storage costs.

Learning content can be shared, reducing duplication of effort.

Which resources can be uploaded to eShare?

The eShare repository is for teaching and learning resources created by staff at Edge Hill University.

Purchased teaching and learning resources may also be added to eShare with the necessary license information included and the associated viewing and access permission included in the repository record for the resource.

Resources should be accessible, complying with the Public Sector Bodies Accessibility Regulations 2018. See the Digital Accessibility page for more information.

Who can upload to eShare?

Edge Hill **staff** members can upload to eShare, logging in with their university username and password.

Is there a limit on file size?

There is **no limit set**. However various technical factors may impact on successful upload of very big files.

How do I upload resources to eShare?

The 'eShare Contributor Guide' takes you through uploading resources to eShare.

Who will be able to access the teaching materials in eShare?

Access to items uploaded to eShare can be restricted to Edge Hill staff and students. It is also possible to share them openly with world, or restrict access to individuals at Edge Hill University once they have created an account by logging in.

Who do I contact with other questions?
