Educational Research Abstracts

Edge Hill University

What is Educational Research Abstracts?

ERA is a comprehensive database comprising specially selected high-quality abstracts which covers current international research in education. A versatile research tool, ERA is supported by a fully-flexible search engine, and comprises links to the full-text online versions of articles where possible. Note: not all articles are full text

How do I access?

- Like all our electronic resources, Educational Research Abstracts is accessible via the Library Catalogue.
- Enter Educational Research Abstracts in the search box, choose 'Title' from the left drop-down menu and 'Electronic Library' from the right drop-down menu and click 'Search'.
- Connect to the database by clicking on the link in the centre of the screen.

Advanced Search

The advanced search form allows you to create an explicit search for journal articles, eBook chapters, reference work articles in our primary publications and publications within our abstract database products. You can enter multiple search terms, and define the field in which you want to look for the term. You can use boolean operators to build up your search expression. For more specific help on each section of the search form and what you can do with it, please click on the help links (?) next to the sections in question.
