GET THE INFOEDGE

Learning Services

Aims

- To provide an introduction to Edge Hill Learning Services

Objectives

By the end of the sessions you will be able you to:

- locate a list of resources, support and guides on Learning Edge & Learning Services Web pages
- locate reading lists
- use the Library Catalogue to find resources
- access your personal library account
- understand the importance of journals to academic research
- search electronic books, journals and databases

Section 1

Getting Started

An information literate person knows when and why they need information, where to find it, and how to evaluate, use and communicate it in an ethical manner (CILIP, 2004).

Edge Hill University provides you with a large collection of print and electronic resources to support your studies.

Information resources come in a variety of formats and could be a:

Book, journal, e-Journal, an e-Book, report, review or guideline. These formats can be located within a subscription database a website or on the library shelves.

All resources are available through the Library catalogue
<http://library.edgehill.ac.uk/>

In addition, a full list of resources, support and guides can be found on the health resources web page on Learning Edge (BlackBoard)

The screenshot shows the library website interface. At the top, there is a navigation bar with the URL 'GO.EDGEHILL.AC.UK' and various menu items like 'A-Z', 'Library', 'Learning Edge', 'Files', 'Edge Hill Blogs', 'Wiki', 'Home', 'Your FoHSC Resources', 'Communities', 'Library Resources', 'Help', and 'Logout'. A blue arrow points to the 'Your FoHSC Resources' button. Below the navigation bar, the main content area is divided into three columns. The first column is titled 'Module Reading List' and contains a search box for 'Reading Lists' with a 'Submit' button. The second column is titled 'FoHSC Subject Resources' and contains a text box with the text 'Get started finding information for your assignments and access support for academic writing & referencing.' Below this text are several buttons: 'Getting Started', 'Find Journal Articles', 'eBook Help', 'Online Research', 'Evidence Based Research', and 'Reference Material'. The third column is titled 'CINAHL Collection' and contains a logo for 'CINAHL' with the text 'Cumulative Index to Nursing and Allied Health Literature' and 'The definitive research tool for nursing and allied health professionals.'

3

Health Subject Resources

Get started finding information for your assignments and access support for academic writing & referencing.

Your subject resources can be accessed by selecting the relevant tab

Ask Us For all your Learning Services enquiries

On the Learning Services pages you will find the same buttons you have on 'Your FoHSC Resources' page in Learning Edge.

As well as databases and electronic journal collections there are lots of useful websites listed on your subject resources pages.

Select the '**Online Research**' button to learn where and how to find

These internet links will enable you to locate good quality evidence-based information which supports decisions for the benefit of patient care.

There are links to documents and publications from the Department of Health that will form part of your academic reading, and there are also policies and guidelines that will help to guide and inform your clinical practice.

Section 2 Using the Library Catalogue

All resources are available through the library catalogue and it is the best place to start your research.

<http://library.edgehill.ac.uk/>

There are various ways to search the library catalogue. Using the drop down menus you can choose to search by

- **Word(s)** e.g. *ethics*
- **Title** exact title
- **Author** Name and initial.
- **Subject** for general subject material e.g. *Health*
- **Class No** e.g. 613.79 BEN

Looking for a specific online journal or database? Use the A- Z eResources List link.

Welcome to Edge Hill's library catalogue

Enter your search terms here if you are searching for books or ebooks

You will find the advanced search page at this link which will provide you with more searching options.

Discover More is a great search tool for finding journal articles and More information resources!

Word Search

Choose **New Search**. Type in **wound care** and press enter.

A drop down list of suggested titles will appear as you type your search and you may select a specific title or simply click on the search symbol (magnifying glass) or press enter to see a full list of titles.

Update your list to titles published in the last ten years. Scroll down the page and look to the left for a filter Year Published. Drag the slider and click Apply

Quick reference to wound care
By Brown, Pamela A. RN
Book. English. **Published** Sudbury, Mass.: Jones and Bartlett Publishers, c2005 2nd ed

Wound Care Made Incredibly Easy!
By Vuolo, Julie
Book. English. **Published** Philadelphia, [Pa.]; London: Wolters Kluwer/Lippincott Williams & Wilkins, c2009 UK ed. / adapted for the UK by Julie Vuolo

Wound Care Made Incredibly Easy!
eBook. English. **Published** Philadelphia: Lippincott Williams & Wilkins, c2007 2nd ed

Wound care made incredibly easy!
Book. English. **Published** Philadelphia, Pa.; London: Lippincott Williams & Wilkins, c2007 2nd ed

From the list find a title called **wound care made incredibly easy** and click on the title. The details of how many copies and at what sites will then be visible, showing you if the book is available or not.

If it is not available in the library at the site where you are (e.g. Ormskirk) do the following:

If you are not logged in select Reserve and you will be prompted to log in.

The screenshot shows a dark grey navigation bar at the top with links: Home, Ask us, Add a book, A-Z Journal List, Help, My Account, and My Saved Lists. Below the navigation bar are two login panels. The left panel has a purple background and is titled 'Edge Hill Staff & Students' (circled in red). It contains the text 'Sign in for access to eResources and your library account' and a yellow 'Login' button. The right panel has a light purple background and is titled 'Partners and Alumni'. It contains the text 'Sign in for access to your library account', two input fields labeled 'card number' and 'pin', and a yellow 'Login' button.

We will then either hold the next returned copy, or get a copy from another site for you and email you to let you know

Reading List Search

Library Catalogue

Click on the Reading Lists Online tab

Welcome to Edge Hill's library catalogue

Then type in your module code and press enter

All the items that are on this reading list will then appear. The list contains both titles of books and journals. Some reading lists also have digitised items, which are usually a chapter of a book or an article, which you can access in full text whilst you are studying a particular module.

If you click onto the title of a record that has appeared you will be able to see if there are any available copies for you to take out.

Ebooks

Choose **New Search** and select **Keyword** from the drop down menu on the left.

In the search box, type in **midwifery** and from the collections menu select **Electronic Library**. Then click on **Submit** to perform the search.

This will search our collection of e-books from a number of collections including Ebsco, Ebrary and MyiLibrary, Dawsonera.

Welcome to Edge Hill's library catalogue

From the results find the book **Study skills for nursing and midwifery students** and click on the website link to go to the ebook.

The screenshot shows a search results page with the following elements:

- Search bar: "Search for 'Study skills for nursing and midwifery...'"
- Filters: "eBook" and "Study Skills for Nursing and..."
- Book cover: "Study Skills for Nursing and Midwifery Students" by Scullion, Philip A; Guest, David A; MyiLibrary
- Access link: "Access: An Electronic book from MyiLibrary"
- Text snippet: "...this is the only book I have come across that gives consideration to student midwives. There are many study skills books available for nursing students, and although this book is aimed at both, it does take into account the differences between the two professions. ...this is a useful book which delves deeper than its cover would suggest." MIDIRS Midwifery Digest This book is an essential course companion for nursing and midwifery students at degree and diploma level, as well as those returning to study. It covers key skills and knowledge needed, such as: Study strategies Reflective practice Critical thinking Evidence-based research Exam techniques Literature searching How to
- Options: Contents, Author note, More Like This

This is an electronic book. The book can be read in the usual way, parts can be printed (in accordance with copyright) and the text can be searched electronically.

The screenshot shows the ebrary reader interface with the following annotations:

- Navigate through the e-book here.**: Points to the navigation toolbar (back, forward, search, etc.)
- Enter search terms here to search within this e-book.**: Points to the "Search Document" input field in the TOC panel.
- Click on the contents or chapters here.**: Points to the "Contents" link in the TOC panel.

The TOC panel lists the following sections:

- Front Cover
- Half-title
- Title page
- Copyright page
- Contents
- Series editor's preface
- Part 1: The student nurse and midwife as a novice learner
- Part 2: Beginning to develop effective study skills
- Part 3: Becoming competent: advanced learning for nursing and midwifery students
- Part 4: Demonstrating proficiency through assessment
- Part 5: Expertise for success: the lifelong learner in nursing and midwifery
- References

eBooks can be accessed via the library catalogue and read anytime and anywhere.

Have a go at searching for some titles yourself.....

The image shows a navigation menu for 'Health Subject Resources'. The menu is organized into several rows of buttons. The first row contains 'Getting Started', 'Find Journal Articles', 'eBook Help', and 'Online Research'. The second row contains 'Evidence Based Research', 'Reference Material', and 'Newspapers'. The third row contains 'Support & Workshops', 'Assignment Help', 'Referencing', and 'Counselling'. The fourth row contains 'Social Work'. A blue arrow points from a text box below to the 'eBook Help' button. The text box contains the following text: 'e-Book help can be located here in 'your FoHSC resources' tabs in your Learning Edge.'

Section 3

Finding Journal Articles

What are Journals?

Journals are publications that appear at regular intervals over the year, weekly, monthly, quarterly, annually.

Health journals usually contain material on one subject area, for example

British Journal of Midwifery

British Journal of Nursing

Journal of Nurse Midwifery

Complementary Therapies in Nursing and Midwifery

A journal will contain a number of articles written by different authors who are working in the field. Before the article is published, the article is often checked over by other experts and this is called **peer-review**.

Journal articles are essential to students' academic study because:

- They provide information that is authoritative and up-to date
- They can be searched electronically, allowing the student access to a large quantity of articles
- They demonstrate that the student has an understanding of what is current practice.

- This workbook looks at searching a full text health journal database, but there are lots of other journal collections and journal databases that you can search to find research information. What is a journal database?

A database is a collection of information, in this case journal articles, arranged in individual records which can be searched by computer. Some journal databases also include conference papers, book chapters, reports, dissertations, books and other types of information.

Journal databases collect together articles in a subject area. The subject could be general (e.g. Health) or more narrowly defined (e.g. Midwifery).

Databases allow you to search for articles using keywords. You can combine keywords or use a phrase to focus your search to find articles most relevant to your topic.

Journal databases generally provide a reference or citation - enough information to allow you to find the article. The citation would normally include: the title and author of the article; the journal name, volume and issue numbers, pages and date; subject headings and often an abstract (summary) of the article. Sometimes the full text of the article is also available.

Key midwifery and nursing journal collections and databases you might want to search in the library catalogue include:

- Internurse
- Cinahl Complete
- Maternity and Infant Care
- Intermid
- Proquest Nursing Journals

How to Recognise a Journal Reference or Citation

On reading lists and bibliographies, journal articles are written in a standard format. A reference to a journal article will look like this:

ROGERS, K., 2013. Exploring the learning experiences of final-year midwifery students. *British Journal of Midwifery*. 18 (7), pp. 457-463. Available from: <http://0-www.magonlinelibrary.com.library.edgehill.ac.uk/doi/pdf/10.12968/bjom.2010.18.7.48788> [Accessed 23 October 2014].

This is broken down as follows:

ROGERS, K.,	Author of the article
2013.	Year of publication
Exploring the learning experiences of final-year midwifery students.	Title of the article
<i>British Journal of Midwifery</i> .	Title of the journal the article comes from
18 (7), pp. 457-463.	Volume, part and page numbers of the article

When you compile your bibliography for your assignments, you must use this format to quote journals. Marks will be lost for incorrectly formatted citations.

This referencing format is called the **Harvard Referencing System**. For more information check the Learning Services web pages at:

<http://www.edgehill.ac.uk/lr>

Section 4

Using electronic journal collections Searching for Journals

The Library provide access to many thousands of journals and journal articles. Journals are listed by title.

Perform a title search for: **British Journal of Midwifery**

New search > Search for "title:(British Journal of Midwifery)" > British Journal of Midwifery x

Edge Hill

[Expand All](#)

These are the library holdings for this journal in paper format

Learning Services subscribe to this journal in two formats, paper and electronic.

There are paper copies at the Ormskirk site where articles can be photocopied.

Copies can be accessed (and printed off) over the internet from any computer attached to the internet.

The screenshot shows the library catalogue interface. At the top, there is a navigation bar with links: Home, Ask us, Add a book, A-Z eResources, Reading Lists Online, RefWorks, Help, My Account, and My Saved Lists. Below this, the main heading reads 'Welcome to Edge Hill's library catalogue'. To the right, there are buttons for 'Useful Links' and 'Discover More'. A search bar is visible with the text '0-9 A B C D E F G H I J K L M N O P Q R S T U V W X Y Z Other' above it. The search results show '1 record retrieved for the search: Title begins with "British Journal of Midwifery"'. The record details are: 'British journal of midwifery (0969-4900) Look up Article More full text options from 01.01.2002 to present in CINAHL Complete'. A blue arrow points from the text 'Copies can be accessed (and printed off) over the internet from any computer attached to the internet.' to the 'A-Z eResources' link in the navigation bar. Another blue arrow points from a text box on the right to the 'Look up Article' link in the search results.

The results page tells us where the journal is held and how many years we have subscribed to it.

Try searching the Library catalogue for any of the following journals:

Journal of Midwifery and Women's Health.

Midwifery

Evidence based Midwifery

Check the results page and find out

- In which format is the journal available, paper or electronic or both?
- Where is the journal held, Aintree, Ormskirk or online?
- Follow the Electronic resources link through and look at a couple of articles.

Section 5

Using databases and journal collections

Learning Services subscribe to a number of large collections of electronic journals. There is a collection for most subject areas.

For health students, **Internurse** and **Proquest Nursing Journals** are the best starting point to learn how to use these resources.

How to search Maternity and Infant Care Database (MWIC)

From the library catalogue type **MWIC** and click “**Search**”.

The catalogue will then search for the resource.

Then click on “**Connect to Maternity and Infant Care (5 simultaneous users)**”

In the search box type **Pregnancy and pre-eclampsia**

The screenshot shows the Ovid Maternity and Infant Care database search results page. At the top, there is a search bar with the text "Pregnancy and pre-eclampsia" and a "Search" button. Below the search bar, there are options for "Limits" and "Map Term to Subject Heading". The main results area is divided into two columns. The left column contains search information, including the search terms used and the number of results returned (3756). The right column contains a list of search results, with the first result being "Placental protein 13 (PP13/galectin-13) undergoes lipid raft-associated subcellular redistribution in the syncytiotrophoblast in preterm preeclampsia and HELLP syndrome." by Balogh A, Pozsgay J, Matko J, et al. The second result is "The correlation between third-trimester maternal and newborn-serum 25-hydroxy-vitamin D in a selected, South Australian group of newborn samples." by Thomas SDC, Fudge AN, Whiting M, et al. Each result has options for "Abstract Reference", "Complete Reference", and "Find Citing Articles".

This is an abstract and Indexing database only. It does not give access to full text articles!

Click on Complete Reference to view the abstract and reference details.

Click on the  button to see if the Library hold this Journal elsewhere. You may be able to get full text from another electronic database, or it may be available in the Library in hard copy. You may need to save the references you find and go back to the library catalogue and search for the Journals there.

Some Search Tips

To use these resources effectively, you will have to learn some search techniques. These techniques are common to all electronic databases.

1. Focusing your research

Too much information

If you do a basic search for “health”, you will come up with an unmanageable amount of information.

Not enough information

If you do a search for “foot injury in students at university”, you may get no hits as this search is too specific.

Hints & Tips

Combine keywords with the operators:

And - Will find all of the words

Or - Will find any of the words

Not - Will find the first but not the second word

“ ” Use "quotation marks" to search for exact phrases.

***** is used as a right-handed truncation character only; it will find all endings of a word. For example, searching for child* will find, “child”, "childs", "child**hood**", children", etc.

? is used to replace any single character, either inside the word or the right end of the word. ? cannot be used to begin a word.

For example searching for f??t will find **foot** and **feet**, but it will also find **fart**!

Using a Discovery Tool

Discovery services are single search tools that provide fast and simple access to print and electronic material available through the library catalogue. The tool searches the Library Catalogue and the majority – although not all - of our electronic resources.

1. From the library catalogue <http://library.edgehill.ac.uk/>
 - Click on the **Discover More** link in search options.

- Enter the following: **ethics and health and women**

- Click search and view your results list.
- How many records are listed in your results?

The results will appear with the most relevant records at the top of the list.

2. Apply limits to make results more relevant:

- From the next screen explore the limits on the left hand side of the page. This will refine your search and find the resources that best match your requirements.
- Scroll down the page to see all the limits that you have to choose from on the left hand side of the screen.
- Make a selection and update your results list.
- Are your results relevant, authoritative and current?

The screenshot shows a search results page for the query "ethics and health and women". The search results are sorted by relevance, showing 347,359 results. The left sidebar contains filters for Refine Your Search, Content Type, Discipline, and Publication Date. The main results area shows several articles, including "ethics" by Megan-Jane Johnstone and "Public Health Ethics" by Stephen Holland. A detailed view of the "ethics" article is shown on the right, including its source, publication information, and subjects.

Number of results: 347,359 results sorted by relevance

Re-sort your results by Date or Relevance here.

You can limit your results to full-text only

Refine your search by applying limiters here

ethics
by Megan-Jane Johnstone
Coleman (2004) argues that the most important theoretical application of ectogenesis is in the abortion debate. Since the key problem with abortion is the fatal evacuation of a fetus from its mother's uterus (called 'severance theory'), ectogenesis stands to 'dramatically change the landscape of the abortion debate'.
Health Module (Alumni Edition)
Source: ProQuest Nursing & Allied Health Source
Publication Title: Australian Nursing Journal
Publisher: Australian Nursing and Midwifery Federation
Volume: 17
Issue: 11
Start Page: 33
Date: 06/2010
ISSN: 1320-3185
Subjects: Science fiction & fantasy, Womens health, Animal sciences, Animal reproduction, Reproductive health, Pregnancy
Language: English
Why is this result here? Your query matched the indexed full text of this

You can limit your search by subject by applying any applicable subject terms located under the **Subject Terms** menu. The **Content Type** menu allows you to limit your search to books and/or academic journal articles.

3. Opening full-text articles

- Full Text through LinkSource or PDF Full Text

The screenshot shows a search results page for 'ethics and health and women'. The left sidebar contains filters for 'REFINE YOUR SEARCH', 'CONTENT TYPE', 'PUBLICATION DATE', and 'DISCIPLINE'. The 'DISCIPLINE' filter has 'nursing' checked. The main results area shows three articles. The first article, 'Women and HIV: ethics and laws', has a 'Full Text Online' link circled in red. A red circle highlights the 'Read Online' button above the article title. A red circle highlights the 'Full Text Online' link below the article title.

The limiters that have been applied are indicated by a tick.

Use this link to locate the full text of the article.

Add articles you wish to keep to an electronic folder.

Hover the mouse over the title to read the abstract which appears to the right. Above the abstract you will find the email article option.

More Help!
