

## What is Sport Discus?

Sport Discus with Full Text is the world's most comprehensive source of full text for sports and sports medicine journals, providing full text for more than 430 journals across all areas of Sport.

## How do I access Sport Discus?

- Like all our electronic resources, Sport Discus is accessible via the Library Catalogue.
- Enter 'Sport Discus' in the search box, choose 'Electronic Library' from the right drop-down menu and click 'Submit'.
- Connect to the database by clicking on 'Website'.

## How do I search Sport Discus?

Use the **Search modes** options to tailor your search. Sport Discus will automatically find all the search terms you enter, but if you want to search for a phrase, e.g. "sport therapy", choose 'Exact Phrase'.

Enter your key words in the **search box**

The screenshot shows the Sport Discus search interface. At the top, there is a search bar with the text "SPORTDiscus with Full Text" and a "Choose Database" dropdown menu. Below the search bar are buttons for "Search", "Clear", and a help icon. A navigation bar includes links for "Search Options", "Basic Search", "Advanced Search", "Visual Search", "Search History/Alerts", and "Preferences". The "Search Options" section is expanded, showing "Search modes" with radio buttons for "Exact Phrase", "Find all my search terms", "Find any of my search terms", and "SmartText Searching". There are also checkboxes for "Apply related words" and "Also search within the full text of the articles". Under "Limit your results", there is a checkbox for "Full Text" and a text input field for "Publication Name". On the right, there are checkboxes for "References Available" and "Peer Reviewed", and a "Language" dropdown menu with options for "All", "English", "French", and "German".

Tick this box to search only for articles that are available in **full text**.

Tick this box to select **peer reviewed** articles – this will give you the best quality information.

**A CALL FOR DRUG-TESTING OF HIGH SCHOOL STUDENT-ATHLETES**

SCOTT A. ANDRESEN\*

Taylor Hooton was your average sixteen-year-old high school athlete. He was popular, outgoing, polite, and committed to achieving a high level of athletic success. Despite being an athletic 6' 2" and 180 pounds, Taylor heard the words no athlete wants to hear from a coach: "[You] need[] to be bigger in order to effectively compete next year."<sup>1</sup> Though it can only be assumed that the coach meant for Taylor to hit the weight room and consume as much protein as he could get his hands on, Taylor believed that something extra might be required to get him where he "needed" to be as quickly as possible. That "something extra" was anabolic steroids. Though Taylor had stopped using some or all of the steroids he was taking, it was the post-steroid depression that likely caused him to commit suicide by hanging himself in his family's home.<sup>2</sup>

It would be easy to question why family, coaches, and teammates were not
